The weather bureau is calling it 'the most vicious storm of the century'. They don't know how right they are!

"Watch the Skies", the long-awaited mini-album picks up where previous Doctor Visor's release ended - at the Old Cemetery! The threat of The Old Ones manifests itself in the skies! Only the Doctor knows how to stop it. But to do that he will have to overcome his fears and become the man he was destined to be...

You can forget Stephen... (sorry, that was from another movie). I mean: Make room for original horror synths infused with heavy metal influences. All electronic, all epic, all exciting! An absolute banger of a record proving that there is no other artist like Doctor Visor. So prepare to be afraid, be very afraid!

"Visor proves, once again, he's the undisputed master of the unknown"
Albert N. Wilmarth, The Arkham Advertiser
